

Sagome di scarpe da ritagliare e stampare

Sei modelli in tre misure, pronti da stampare su A4 e ritagliare.

Come si usano

1. Stampa la pagina del modello che ti serve in formato A4, senza adattamento: nelle opzioni di stampa scegli «Dimensioni reali» oppure «100%».
2. Ritaglia lungo la linea continua. La linea tratteggiata è solo un riferimento per il decoro: non va ritagliata.
3. Per usare la sagoma come cartamodello su stoffa o feltro, aggiungi un margine di mezzo centimetro tutto intorno.
4. Per il cartoncino, appoggia la sagoma, traccia il contorno con la matita e ritaglia.

Le misure

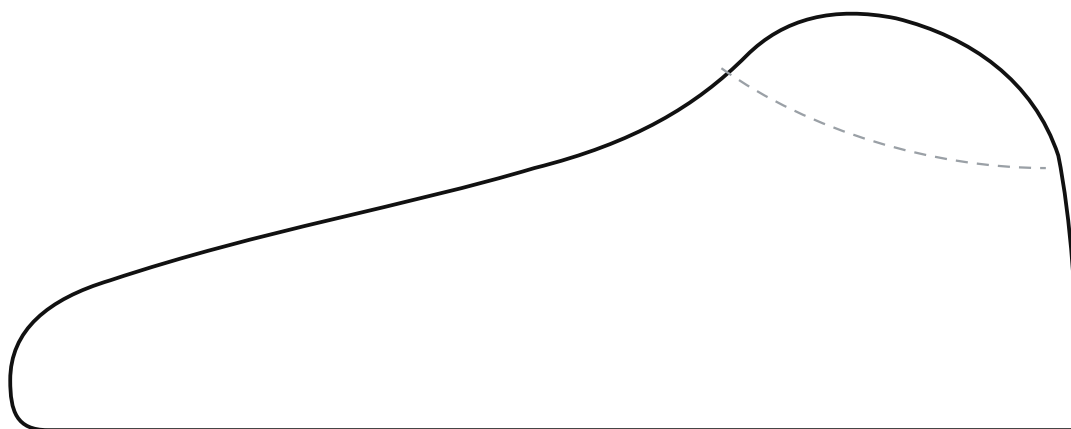

Ogni pagina contiene lo stesso modello in tre misure: grande, media e piccola. La scarpina da neonato e la suola sono anche una buona base per lavoretti e decorazioni.

Modelli inclusi

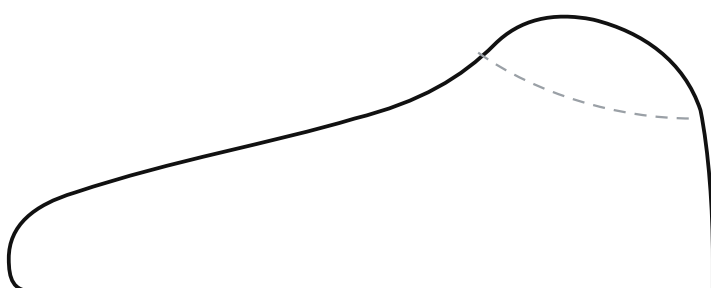

- Scarpa da ginnastica
- Ballerina
- Stivaletto
- Scarpa con tacco
- Scarpina da neonato
- Suola, vista dall'alto
